Associate Software Engineer – QA Automation **Oct 2025 – Present**

VRIZE *Naya Raipur, Chhattisgarh*

- Developed and deployed robust test automation frameworks across US, MX, and GT platforms, achieving a 40% reduction in release cycle times and ensuring consistent delivery of stable software releases.
- Automated test scenarios using Playwright, Cucumber, and Java (IntelliJ IDEA).
- Implemented CI/CD pipelines using GitHub Actions and managed code via Git/GitHub.
- Managed testing workflows, defects, and sprints using Azure DevOps.
- Validated workflows using Mailosaur and generated reports to ensure application quality.

Full-Stack Frontend Developer **2026**

Solo project *Durg, Chhattisgarh*

- Built an AI interview prep app generating role-specific questions and scoring answers via LLM with structured JSON output.
- Implemented lazy-loaded modules, route guards (CanActivate, CanDeactivate, Resolve), HTTP interceptors, and RxJS-based caching/search (shareReplay, switchMap, debounceTime).

Web Developer Intern **2024**

Oasis Infobyte *Durg, Chhattisgarh*

- Built and deployed multiple frontend applications (portfolio website, landing page, temperature converter) using HTML5, CSS3, and JavaScript (ES6).
- Ensured consistent user experience across devices through responsive design and cross-browser testing.

Technical Skills

- **Languages:** Python, Java, JavaScript, Angular, SQL, C++
- **Automation & Testing:** Playwright, Cucumber (BDD), Mailosaur, Postman
- **DevOps & Tools:** Git, GitHub, GitHub Actions, Azure DevOps, AWS, CI/CD Pipelines
- **Web Technologies:** React.js, HTML5, CSS3, REST APIs
- **Databases:** MySQL
- **APIs & Integration**: : REST APIs, OAuth 2.0, API Integration
- **AI / ML:** Pandas, NumPy, Scikit-learn, PyTorch, LLMs (Groq API, Ollama)
- **Developer Tools:** IntelliJ IDEA, VS Code, n8n

Projects

AGENTIC AI | SDLC ORCHESTRATION

- Developed AI-driven prompt generation and user story automation workflows to enhance SDLC orchestration and requirement engineering processes.
- Integrated QA automation tools and database integration into SDLC pipelines for backend, frontend, API, and deployment validation within CI/CD environments.
- Executed regression, integration, and end-to-end testing using Python-based automation frameworks to improve software quality and release stability. .

MEETING MIND AI | GEN-AI

- Engineered a Generative AI–powered meeting analytics pipeline using pyannote.audio, faster-whisper, FFmpeg, Groq API, and Ollama to automate multilingual transcription, speaker diarization, transcript merging, and meeting summarization, improving transcription turnaround time by 30%.
- Developed intelligent meeting intelligence features including action-item extraction, sentiment analysis, speaker analytics, meeting health scoring, MoM generation, and AI-powered chat assistance using LLaMA 3.1 models, increasing information retrieval efficiency by 40%.
- Built an interactive Streamlit dashboard integrated with Plotly, googletrans, gTTS, JSON/TXT export, and email workflows to support multilingual insights, visual analytics, report sharing, and improved cross-functional team collaboration, reducing task completion time by 25%. .

ROSTER MANAGEMENT | *React.js, Html5, Css3*

- Developed a responsive Team Roster Management System using React.js, JavaScript, and MySQL with real-time CRUD operations, automated shift rotation, and seamless REST API integration.
- Implemented Excel export functionality using Apache POI and SheetJS to generate structured roster reports, improving shift planning, reporting, and team coordination efficiency.

Education

B.Tech | Bhilai Institute Of Technology Durg **Sep. 2021 – Aug 2025**

CPI 9.3 *Durg, Chhattisgarh*
